The Subject Index for Volume 249 will appear as part of a cumulative index for the year 1998.

INFORMATION FOR CONTRIBUTORS

Biochemical and Biophysical Research Communications (BBRC) is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Articles submitted should be written to emphasize clearly the novel aspects of the information reported.

Authors submitting an article do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal. For rapid processing of the article, please include a signed photocopy of the copyright transfer agreement (see the form at the end of these instructions). This form will not be binding if the article is not accepted for publication in BBRC.

Original papers only will be considered. Contributions are accepted for review with the understanding that the same work has not been submitted to another Editor of this journal, that it has not been published, and that it is not under consideration for publication elsewhere: further, that any person cited as a source of personal communications has approved such citation. **Prior to submission for publication, the contribution must be approved by all of the authors and by the institution where the work was carried out.**

Submitting Manuscripts

Authors should submit two double-spaced hard copies of their article to one of the Editors listed on the inside front cover. The areas of interest of each Editor can be found at the BBRC web site: <http://www.academicpress.com/www/journal/rc.htm>. Authors are strongly encouraged to include a copy of their manuscripts, including art, on disk. The disk must *exactly match* the hard copy. For review purposes, the hard copy must include the original illustrations. A self-addressed mailing label should also be included.

Disks. Disks should be labeled with the computer used (Mac, IBM, Unix) and the brand and version number of the software (Microsoft Word 6.0, WordPerfect 3.0, etc.). For information on preparing manuscripts on disks, please contact the Publisher (telephone: (619) 699-6870).

General Instructions

The length of the article should not exceed six printed journal pages, including all figures and tables (one page contains approximately 880 words, two or three figures or tables, or 70 references).

Illustrations in color can be accepted only if the au-

thors defray the cost. The cost for the first page is \$950. Each additional page is \$750.

The order of the elements of an article is title, authors, affiliations, received date, abstract, main text, appendices (if any), acknowledgments, references, footnotes, and figure legends.

The abstract should adequately summarize the pertinent findings of the article and should not exceed 150 words.

The corresponding author information should include telephone and fax numbers and e-mail address. Indicate with a footnote if this information should appear on the title page of the printed article.

For abbreviations, symbols, nomenclature, and isotopic labeling, consult the Instructions for Authors of *Archives of Biochemistry and Biophysics* (1997, Vol. 337, No. 1, pp. v–xx), especially Tables I, VIII, and XI. Reprints of the *Archives* Instructions to Authors are available from Academic Press.

Protein or gene databases. The Editors encourage the use of databases as repositories for detailed data on protein structure (e.g., X-ray crystallographic coordinates) and on DNA sequences and mapping assignments. Verification of submission and, when available, pertinent accession numbers should be provided with the manuscripts.

Chemical or biological hazards, if any, in carrying out the experiments described should be clearly noted in the Methods section. Any relevant safety precautions should be described. If an accepted code of practice has been followed, a reference to the relevant standards should be given.

References to the literature should be cited by number in parentheses in the text and listed in numerical order at the end. Use the most recent edition of the *Chemical Abstracts Service Source Index* for abbreviations of journal titles. Provide inclusive pagination, as in the following examples:

1. Kumar, M., and Spandau, D. F. (1995) *Biochem. Biophys. Res. Commun.* **214**, 744–753.
2. Hesketh, R. (1995) *The Oncogene FactsBook*, Academic Press, London.
3. Shenk, T. (1995) in *Viral Vectors* (Kaplitt, M. G., and Loewy, A. D., Eds.), pp. 43–54, Academic Press, San Diego, CA.

Proofs. Due to the rapid publication of articles accepted to BBRC, authors will not receive proofs of their papers. Any changes to accepted manuscripts should be faxed immediately to Production Editor, BBRC, at (619) 699-6801.
